This is a guide to Low Power AM (LPAM), Community Radio (CR), Restricted Service Licence (RSL) and Irish Temporary Licence (BCI TEMP) radio stations that are currently on air and a compilation logs, along with the original Special Event Radio (SER) stations, that have appeared in the British DX Club's monthly journal "Communication" since the mid-1980's (with additional logs added retrospectively from readers of this guide).

Britain's first ever Special Event Radio licence was granted to Greenbelt Festival Radio in 1983, a short-term radio station at the Greenbelt arts festival. The station was pioneered and led by Peter Laverock. This was the precursor of the Restricted Service Licence stations we now have, and the first ever legal radio station run by enthusiasts rather than professionals. From noon on Friday 26th August to noon on Tuesday 30th August a dedicated team presented programmes on 963 AM including Christian music, speakers and poets. There was news from the festival and requests from listeners across the site. The studio was a small caravan in the backstage area, with a minimum amount of technical equipment. Guests included a brief interview with Cliff Richard after his mainstage concert. (info from [www.wayneclarke.org/radio/radio-revolutionaries](http://www.wayneclarke.org/radio/radio-revolutionaries))

In 1991 the SER licence was replaced by the Restricted Service Licence (RSL), which was issued by the Radio Authority instead of the Home Office (now issued by Ofcom). RSL licenses are granted for such things as coverage of special events and other special projects (e.g. training). Licensees are limited to a small coverage area and a usual maximum of 28 consecutive days. There are some exceptions to the consecutive days rule when covering a series of events such as those for sport (Radio Rovers on 1404 kHz and Radio Thruxton on 1602 kHz are current examples where they operate only when an event is being held).

Low Power AM (LPAM) licences are issued throughout the UK, except within an area enclosed by the M25 London orbital motorway, and allow for freely-radiating transmission on the AM waveband at a usual maximum radiated power of up to 1 watt. The first experimental licence was issued in 1997 and since 1999 have been used for many establishments including military bases, universities and hospitals with fixed boundaries.

Community Radio (CR) stations typically cover a small geographical area with a coverage radius of up to 5 km and run on a not-for-profit basis. The idea for this new level of radio broadcasting was piloted by the regulator at the time, the Radio Authority in 2002 with the licensing of 15 so-called Access Radio stations for a trial period of one year to test the feasibility of such stations. The licences were extended in 2003 for a further year, and in 2004 a consultation was issued by the Authority's successor, Ofcom, on the creation of Community Radio. They can cater for whole communities or for different areas of interest – such as a particular ethnic group, age group or interest group. Community Radio stations reflect a diverse mix of cultures and interests. For example, you can listen to stations which cater for urban or experimental music, while others are aimed at younger people, religious communities or the Armed Forces and their families.

The Broadcasting Commission of Ireland (BCI) is the body that authorises stations to operate in the Republic for short periods, with temporary licenses allowing them to be on air for up to thirty days in a given twelve month period. These licenses may be used by stations providing a service to coincide with local, cultural and sporting events or festivals. One such recent example of this kind of temporary licenced station (BCI TEMP) is Zenith Classic Rock on 1584 kHz.

One other kind of station that appears in this survey is the Test and Development licence that was issued to Bessemer Broadcasting in Sheffield on 1413 kHz and South Shropshire Communications on 1512 kHz in 1990/91.

## LATEST NEWS

**Items from BDXC "Communication", UK & Ireland News, edited by Dave Kenny,  
and members' postings to the BDXC Email News Service**

**Ofcom has awarded AM community radio licences to 5 groups, including Radio Caroline:**

**Ark AM (Glasgow)** - will serve the needs of Glasgow's diverse Muslim communities; Website [www.ark.scot](http://www.ark.scot)

**Carillon Wellbeing Radio (West Leicestershire)** - for people who have, or who are at risk of developing, long term health conditions. Contact is Jon Sketchely [admin@carillonradio.com](mailto:admin@carillonradio.com)

**Radio Caroline (Suffolk & North Essex)** - album music from the 1960s to the present day, for people aged 45+. Contact is Peter Moore, website [www.radiocaroline.co.uk](http://www.radiocaroline.co.uk)

**Radio Ninesprings (Yeovil)** - local community radio for Yeovil and South Somerset  
 Website [www.radioninesprings.com](http://www.radioninesprings.com)

**Radio Seerah (Leicester)** - for the diverse Muslim and ethnic communities of inner Leicester.  
 Website [www.radioseerah.com](http://www.radioseerah.com)

*At the same time Ofcom has announced that it has decided not to award a licence to the other four groups that applied for AM licences: AM Rock (Thanet/Canterbury/Dover); Indus Radio (Birmingham), Leicestershire Community Talk Radio; Panj Pani Radio (Leics/Derbys/Northants); Radio Centra (Inner Birmingham).*

**Radio Caroline: AM Licence - a Kilowatt on 648**, the following is from [www.radiocaroline.co.uk](http://www.radiocaroline.co.uk) on 2 June 2017: "We are pleased to announce that Ofcom have informed us that our application for an AM licence has been approved and that a licence will be awarded. This is the end of, or a further step in, a process started by Bob Lawrence in 2010 and enthusiastically supported by Tracey Crouch MP. We thank them both and further thank the many other people who have helped along the way. The basis of our application was that our traditional heartland was Essex and Suffolk, where the signal from our ships made first landfall and that we wished to entertain on AM, an audience that we have not been able to serve in this way since 1990. We said that this audience may hear music radio of a style they remember and in some cases presented by the same people they remember. That in essence is what we intend to do. We can now announce that our AM frequency will be 648 kHz with a power of 1000 watts. This is ERP or simply the power radiated by the aerial. A transmitter was imported from the Continent a few days ago and is now being modified to suit the frequency. There are further hurdles, but as you can see progress is being made. Watch this space".

**BFBS Radio, Glencorse Barracks, closed: BFBS Radio at Glencorse Barracks**, Penicuik, Midlothian, on **1287 kHz** is no longer heard. Using the KiwiSDR at Edinburgh in May, only Victoria Radio Network (VRN), Victoria Hospital, Kirkcaldy, Fife, was weakly heard on this frequency. (Dave Kenny)

### 936 kHz

#### **936 kHz - DALES RADIO, BRUNT ACRES ROAD, HAWES, NORTH YORKSHIRE (CR)**

<b>kHz</b>	<b>UTC</b>	<b>Details</b>	<b>SIO</b>	<b>Date</b>	<b>Inits</b>
936	1126	Hearing music on 936 kHz, no anns yet, not Smooth, Dales R testing?	~~~	04/11/15	nr
936	1234	Dales R, Hawes. "This is a test transmission from Dales Radio, the new Community Radio station for The Yorkshire Dales. Coming soon on AM, FM and on-line. Keep listening, Dales Radio"; Repeated between each record. Seemed weaker than yesterday. Had to use N-S wire fence as ferrite sleeve was struggling to copy speech	~~~	05/11/15	nr
936	1220	Dales R, Hawes. Testing with music and IDs again. According to e-mail from Chris Parkin of Dales Radio, they are testing with a power of 100 Watts emrp and will be starting full programmes in the next few weeks	~~~	08/11/15	nr
936	0615	Dales R, Hawes. Got Dales Radio this morning here in Germany	~~~	10/11/15	ABO*
936	1330	Dales R, Hawes. Still testing with announcements between every other record. "Across the beautiful Yorkshire Dales we are proudly your station ... Dales Radio" and "From The Dales to The Dales, this is your Dales Radio". A good selection of oldies, not just 60's and 70's stuff. Reception seems better now they are using 150W. SIO 343 with a N-S wire fence aerial. Can just follow speech using a small loop aerial in the house, Dales' audio sounds good. I use a decent pair of headphones with the R9924 portable which makes all the difference	343	21/11/15	nr
936	1500	Dales R, Hawes. Heard testing still with station IDs between every other record. "Your station, Dales Radio" and "From The Dales to The Dales, this is your Dales Radio". Still in the clear until 1530 then Spain fade-in	343	01/12/15	nr
936	~~~~	Dales R, Hawes. Fair signal on car radio just outside Ambleside. Only had times to check mid-morning and late afternoon. Was in two high spots near a place called Holbeck Ghyll and also not far from Hakeshead at a place called Tarn Howes	~~~	02/12/15	RC+
936	~~~~	Dales R, Hawes. Heard their test 'tape' when driving the A66 from Scotch Corner to Penrith; signal was fine (for AM) for most of journey	~~~	28/12/15	AMc+
936	0815	Dales R, Hawes. Start-up day! Managed to catch live programming at 0815 whilst up on the hills dog-walking. Need the assistance of a wire fence aerial here as the signal is barely detectable at home even with a small loop. I assume it's because they are using 150 Watts as opposed to the 1 kW when they were YDR/Fresh when a small loop and a large Hacker gave reasonable results	~~~	11/01/16	nr
936	1418	Dales R, Hawes. "Your station, Dales Radio", mx	333	13/01/16	SAC

Anything to add? This guide does not include every SER, RSL, LPAM or CR station that has operated on mediumwave over the years, only those that have been reported to "Communication", so there are a good number of stations that do not appear. Have you got something in your logbook from the past that could be added? This is an on-going project and there is scope to add logs from years gone by. We would be delighted to hear from you, even if you are not currently a member of the British DX Club. Please email your logs to Tony Rogers - [tony@bdxc.org.uk](mailto:tony@bdxc.org.uk)

### **KiwiSDR online receivers**

Several KiwiSDR receivers in the UK are available online amongst the 135+ worldwide listed at [www.hdr.hu](http://www.hdr.hu). These are particularly useful for checking LPAM/CR/RSL stations on mediumwave, as well as UK local radio stations in general. Those currently available at the time of editing are:
